A Safer Future

One of Mashable's "17 books every activist should read in 2019"
Twenty years after Columbine, a leading gun

Bookmark File PDF A Safer Future

control activist offers a radical argument for the gun control movement our country desperately needs Ninety-six people die from guns in America every single day. Twelve

Bookmark File PDF A Safer Future

thousand Americans are murdered each year. The United States has more mass shootings, gun suicides, and nonfatal gun injuries than any other industrialized country in

Bookmark File PDF A Safer Future

the world. Gun-safety advocates have tried to solve these problems with incremental changes such as background checks and banning assault style military weapons. They

Bookmark File PDF A Safer Future

have fallen short. In order to significantly and permanently reduce gun deaths the United States needs a bold new approach: a drastic reduction of the 390 million guns already

Bookmark File PDF A Safer Future

in circulation and a new movement dedicated to a future with fewer guns. In Guns Down, Igor Volzky tells the story of how he took on the NRA just by using his Twitter account,

Bookmark File PDF A Safer Future

describes how he found common ground with gun enthusiasts after spending two days shooting guns in the desert, and lays out a blueprint for how citizens can push their governments

Bookmark File PDF A Safer Future

to reduce the number of guns in circulation and make firearms significantly harder to get. An aggressive licensing and registration initiative, federal and

Bookmark File PDF A Safer Future

state buybacks of millions of guns, and tighter regulation of the gun industry, the gun lobby, and gun sellers will build safer communities for all. Volzky outlines a New

Reducing the Human Cost of War

The U.S. is the world's biggest jailor and one of the most affluent murderous countries, and yet its citizens pay more taxes to sustain law and order

Bookmark File PDF A Safer Future

than their European counterparts. Yet, the U.S. has the most data in the world on the use of incarceration and its failure. Its researchers have identified more projects able to prevent violence than the rest of the world put together. Its

Bookmark File PDF A Safer Future

legislators have access to pioneering data banks on cost effective ways to use taxes to reduce crime. We are left wondering why we cannot implement measures that we know will work, reduce crime, and cost less for law and order.

Bookmark File PDF A Safer Future

Smarter Crime Control shows how to use recent knowledge and best practices to reduce the extraordinarily high rates of murder, traffic fatalities, drug overdoses, and incarceration, while avoiding the high taxes paid by families for policing and

Bookmark File PDF A Safer Future

prisons. Providing detailed examples, Irvin Waller offers specific actions our leaders at all levels can take to reduce violence and lower costs to taxpayers. He focuses on how to retool policing and improve corrections to reduce reoffending and crime,

Bookmark File PDF A Safer Future

while limiting criminal courts. He also shows how programs and investments in various strategies can help those youth on the path to chronic offending avoid the path all together. Waller shows how to get smart on crime to shift the criminal justice

Bookmark File PDF A Safer Future

paradigm from the failing, outdated, racially biased, and exorbitant complex today to an effective, modern, fair and lean system for safer communities that spares so many victims from the loss and pain of preventable violence. He makes a compelling

Bookmark File PDF A Safer Future

case for reinvesting what is currently misspent on reacting to crime into smart ways to prevent crime. Ultimately, he demonstrates to readers the importance of reevaluating our current system and putting into place proven strategies for crime

Bookmark File PDF A Safer Future

and violence prevention that will keep people out of jail and make our streets and communities safer for everyone.

In 1989, the U.S. National Committee for the Decade for Natural Disaster Reduction was formed at the request of the

Bookmark File PDF A Safer Future

federal government to develop a Decade program for the nation. This Committee believes that the trend of increasing losses to natural disasters can be reversed. This change can be achieved by integrating hazard reduction policy and practice into

Bookmark File PDF A Safer Future

the mainstream of community activities throughout the nation and the world. The Decade presents an opportunity to reassess the approach to natural hazards and to develop strategies for reducing losses by stressing prevention and preparedness

Bookmark File PDF A Safer Future

while sustaining and enhancing essential disaster response, relief, and recovery capabilities. The Committee proposes a multidisciplinary program that integrates the following elements: hazard and risk assessments; awareness and

Bookmark File PDF A Safer Future

education; mitigation; preparedness for emergency response, recovery, and reconstruction; prediction and warning; strategies for learning from disasters; and international cooperation. These seven elements must be developed in

Bookmark File PDF A Safer Future

union so that, collectively, they can provide a framework for hazard reduction over the next 10 years and beyond. This report sets forth recommendations for each element.
