Where did professional social work originate from? How effective are social work interpretations in the lives of vulnerable people? A Textbook of Social Work provides a comprehensive discussion of social work practice and its evidence-base. It strikes a balance between the need for social workers to understand the social, economic, cultural, psychological and interpersonal factors which give rise to clients' problems, and the need for them to know how best to respond with practical measures. Divided into three parts: the text covers the history and of social work as a movement and profession in the first, and social work methods and approaches in the second. The final part looks at the major specialisms, including, among others, chapters on: Children and families Youth Offenders and substance misusers Social work and mental health Disabled people Older People Providing a comprehensive guide to conceptual and methodological issues in social work and containing plentiful case studies and examples, this book is an essential read for social work students, as well as a valuable resource for practitioners and academics.

An in-depth look at academically selective public high schools in America What is the best education for exceptionally able and high-achieving youngsters? Can the United States strengthen its future intellectual leadership, economic vitality, and scientific prowess without sacrificing equal opportunity? There are no easy answers but, as Chester Finn and Jessica Hockett show, for more than 100,000 students each year, the solution is to enroll in an academically selective public high school. Exam Schools is the first-ever close-up look at this small, sometimes controversial, yet crucial segment of American public education. This groundbreaking book discusses how these schools work—and their critical role in nurturing the country's brightest students. The 165 schools identified by Finn and Hockett are located in thirty states, plus the District of Columbia. While some are world renowned, such as Boston Latin and Bronx Science, others are known only in their own communities. The authors survey the schools on issues ranging from admissions and student diversity to teacher selection and curriculum, and the role of parents in their schools. Los Angeles, for example, has no "exam schools" while New York City has dozens. Asian-American students are overrepresented—but so are African-American pupils. Culminating with in-depth profiles of eleven exam schools and thoughtful reflection on policy implications, Finn and Hockett ultimately consider whether the country would be better off with more such schools. At a time of keen attention to the faltering education system, Exam Schools sheds positive light on a group of schools that could well provide a transformative roadmap for many of America's children.
