

Ccj

Christians and Jews Building Bridges tells how Christian-Jewish relations have improved dramatically since the Council of Christians and Jews was founded in 1942. It is now widely recognised that Jesus was a faithful Jew and that Jews and Christians both seek the coming of the Messianic Age or Kingdom of God. This book looks back at the issues which have been of most importance in Jewish-Christian relations in the last twenty years. The second part of the book is a reminder that dialogue does not take place between religions but between people. It tells the story of some of those active in the life of the Council of Christians and Jews (CCJ) The book is a sequel to 'Children of One God', which told the story of the first fifty years of CCJ. Marcus Braybrooke is a retired Anglican parish priest, interfaith activist and author of Meeting Jews. He studied in Jerusalem and was a Director of CCJ. He is President of the World Congress of Faiths and Co-Founder of the Three Faiths Forum.

You Are Unique Aren't you ? Biologically it is quite clear that everyone is Unique, right from the birth. We are told that the human genome is a string of some 70 billion pairs of protein molecules arranged in different sequences. Of course, as I understand it, many parts of the sequence are more or less fixed, but there is still a lot of room for a seemingly infinite number of combinations and permutations that determine individual characteristics. According to the author in today's day and age of competition where everything is a click away on the net from jobs to businesses, 'you are Unique' Aren't You?' Is no longer just an adjective but an essential skill to be successful in the corporate world? In the present day Personal Branding is not only for celebrities or artists but is getting increasingly essential for everyone as the web is going more social. Personal Branding is about you telling the world your unique characteristics. Everything we say or do now-a-days can potentially end up being on the World Wide Web. However it is possible to contain these to an extent through Online Reputation Management (ORM) with the amount of dependency we have on the internet, lack of positive ORM can be potentially make or break a business or a career. Positive ORM helps monitor a person, company or a brand on the web have maximum visibility of positive information, suppressing any negatives. Social Media biggest revolution after Sir Timothy John "Tim" Berners-Lee invented internet. Social Media has made large network of people from around the world interact, hang out with each other, share interests, network and even find jobs and promote businesses through their personal profiles, making it essential to question not whether 'IF' but 'WHEN' you should start using them.
