Based on the CNE® examination blueprint, *Certified Nurse Educator Review Book: The Official NLN Guide to the CNE® Exam, Second Edition* delivers a comprehensive review to prepare you to take the Certified Nurse Educator examination. Each chapter provides an overview of the content included on the exam blueprint and practice test items, complete with rationales for correct and incorrect answers, reflecting the types of items you will encounter on the exam. This revised edition streamlines and enhances your exam preparation with updated content, additional bulleted lists and tables, additional practice questions, and example scenarios that demonstrate the practical application of chapter concepts. The authors have done excellent work, reinforcing major skills and responsibilities of this advanced generalist role. This book will be most useful for students as they prepare for certification. From the Foreword by Linda Roussel, DSN, RN, NEA-BC, CNL Co-Author, *Initiating and Sustaining the Clinical Nurse Leader Role: A Practical Guide* The first and only resource of its kind, this review guide to the CNL certification exam stems directly from Dr. King's classroom, where she proposes students to take the exam and has achieved a 100% pass rate. The guide covers all aspects of the test, including basic test-taking skills, how to understand exam questions, multiple exam questions with answers and rationales, and content review of information derived from the AACN exam guide. The authors, who are noted CNL educators and practitioners, cover concepts of horizontal leadership, interdisciplinary communication and collaboration skills, and health care advocacy. They address care management, team coordination, illness/disease management, health promotion and disease prevention management, and advanced clinical assessment. The differences between health systems and the specific microsystems in which CNLs work are explored. The book also encompasses health care finance, economics, policy, informatics, ethics, and evidence-based practice as it is covered on the test. The material is presented in easily digestible sections that correspond to specific areas of the AACN exam guide. Multiple vignettes and unfolding case studies reinforce concepts. Also included is a sample test. Key Features: The first and only comprehensive review guide to the CNL certification exam Presents guidelines on question dissection and analysis Reflects changes and additions to new topics in the exam Presented in easily digestible sections that correspond to AACN exam guide

The World Health Organization has developed these Nurse Educator Core Competencies to enable educators to effectively contribute to the attainment of high quality education, and the production of effective, efficient and skilled nurses who are able to respond to the health needs of the populations they serve. This will enable the attainment of objectives one and two of the Global strategy on human resources for health: Workforce 2030 and is also a priority in the updated Global strategic directions on nursing and midwifery 2016-2020. The aim of this publication is to provide a clear outline of Nurse Educator Core Competencies and performance expectations, which can form the basis for developing a competence-based curriculum encompassing the cognitive, affective and psychomotor skills and behaviors expected of nurse teachers. The competencies are intended to help guide the educational preparation of nurse teachers; ensure educational quality and accountability; and, ultimately, contribute to improving the provision of nursing care and outcomes of health services. Much effort has gone into the preparation of the Nurse Educator Core Competencies. It is the aim of the World Health Organization that they will facilitate nurse educators to attain increased proficiency in assisting student nurses to acquire all the knowledge, skills and attitudes necessary to practice nursing effectively in the 21st century.

Comprehensive and concise study guide for adult and family nurse practitioner students preparing for the AANP and ANCC certification exam. Featuring NP StudySMART. A special online practice test tool with sample questions and answers with rationales.

Certified Nurse Educator Exam Practice Questions are the simplest way to prepare for the Certified Nurse Educator Examination. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. Our Certified Nurse Educator Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our Certified Nurse Educator Exam Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

Family Nurse Practitioner Certification Review is an ideal study guide for new and recertifying nurses preparing to take the Family Nurse Practitioner (FNP) certification exam administered by the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Program (AANPCP). Written by nurse practitioners, it offers up-to-date questions and answer rationales specific to FNP certification that reflect the most current guidelines. In addition, it offers a short theory review, clinical application of knowledge, and clinical skills. Also incorporated are ethical and legal considerations, scope of practice, and cultural sensitivity. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Research shows that the sharing of personal, first-hand stories not only enhances learning and eases the transition to a new role, but also helps novice educators to understand that their challenges are shared by others. With the goal of improving the experience of nurses transitioning from clinician to educator, in hospitals as well as schools of nursing, this unique book presents the stories of nurses who made this transition. It presents the findings of several qualitative studies addressing the question, "What is the lived experience of clinicians as they assume new roles as clinical nurse educators?" These narratives describe the challenges they faced and transformations in each nurse's identity and relationships during the transition process. The text includes recommendations from the Carnegie Foundation for the Advancement of Teaching and specific problem-solving strategies that have worked for others. The narratives are from nurse clinicians, nurse educators, and students who provide insights into such common dilemmas faced by novice educators as "How do I keep a patient safe while allowing the student nurse to practice a skill for the first time?" "If a student is slow to catch on to a procedure, how long do I wait before they fail?" "How do I help provide a safe and effective learning environment for new graduate nurses?" The book includes stories of students who describe caring and uncaring experiences with clinical nurse educators. Stories address cultural diversity, bullying, and dilemmas related to critical and ethical thinking. Nurse educators themselves share insights into what they wish they had done differently to guide students and new graduate nurses in their learning. While these storytellers had diverse clinical and educational backgrounds, there were consistent similarities between the experiences they described. One common thread was the need to embrace the role of a novice in order to succeed. The book will serve as a valuable text for graduate students in nurse educator courses as well as students and nurses seeking support, insight, and inspiration in their transition to the clinical nurse educator role. **Key Features:** Presents experiential narratives from nurses who made the transition from clinician to educator Describes important aspects of a nurse's transition from the role of clinical expert to that of novice educator Includes research-based insights in a highly accessible style and format Integrates National League for Nursing Core Competencies into the text Provides inspiring, helpful, and comforting guidance for nurse clinicians feeling lost or confused in a new role Developed through theoretical thinking and tested by nurse education researchers, the NLN Jeffries Simulation Theory helps to articulate phenomena that exist within clinical simulation. By establishing and communicating known relationships within these phenomena, this theory provides a strong foundation for research and education, and enables future discovery of best practices in simulation. Through rigorous research and literature review, and by incorporating the perspectives of nurses immersed in simulation activities, The NLN Jeffries Simulation Theory is an effective guide to implementation and further research.

Why Use this Book Excellent patient outcomes is the number one goal for all healthcare providers, including nurses. Nurses contribute to improving patient outcomes through excellent nursing care using abilities such as predicting and managing potential complications and decreasing the failure to rescue rate. To meet the goal of excellent patient outcomes, nurses must learn how to think, specifically how to use clinical judgment. However, before a nurse can use clinical judgment, the nurse must first develop

clinical judgment. This book does just that! "Think Like a Nurse: A Handbook" unlocks the mystery of thinking like a nurse by providing a step-by-step approach for developing clinical judgment. All nursing students and nurses can benefit from what this book presents. Finally! A book that teaches how to develop clinical judgment! Who Should Use this Book This book is written as a textbook for use in all levels of pre-licensed nursing education: LPN/LVN, Associate Degree, Baccalaureate Degree, and entry-level Master's Degree students. It can also be used in all RN-to-BSN programs as students revisit the process of developing clinical judgment then learn to apply clinical judgment in community health settings and management in health care. RN-to-BSN students can also use this information as they work with nursing students or orient new staff in the practice setting. This book is also an excellent resource for nursing professional development practitioners and nurse preceptors as they work with new graduates and new nurse hires to expand their application of thinking as a staff nurse. Finally, this book is a critical element for all students enrolled in Master's in Nursing Education programs. Those being educated as faculty in nursing programs and as nursing professional development practitioners must focus on teaching thinking if we are to meet the ultimate goal of improved patient outcomes through excellent nursing care.

It is essential to recognize academic nursing education as a specialty area of practice and academic nurse educators as an advanced practice role within professional nursing. The Scope of Practice for Academic Nurse Educators and Academic Clinical Nurse Educators, Third Edition outlines core competencies with task statements for both academic nurse educators practicing in the full scope of the faculty role and academic clinical nurse educators who work with learners in clinical settings. This updated resource presents the historical perspective, values and beliefs, theoretical framework, research in the academic nurse educator roles, and future for those roles. The discussion of each role details relevant definitions, scope of practice, standards of practice, and specific competencies.

Written specifically for nursing faculty from the leading experts in concept-based nursing curricula, Mastering Concept-Based Teaching gives you all the strategies and guidance you need to plan, develop, and deliver an effective concept-based curriculum. Renowned authors Dr. Jean Foret Giddens, Dr. Linda Caputi, and Dr. Beth Rodgers walk you through the background and benefits of using a concept-based learning approach, how to apply a research-based approach to teaching concepts, how to improve and evaluate student learning with concepts, and much more to ensure you are ready to successfully bring concepts into your nursing program. This insightful and indispensable guide to concept-based education: Provides an understanding of the nature of concepts, their function in the process of learning, and the importance of being consistent in the selection and implementation of concepts. Provides a general framework of general steps associated with the development of a concept-based curriculum. Illustrates ways to enhance the conceptual approach with balanced teaching strategies, an open environment, and engaging learning activities. Explains the importance of analyzing evaluation data to determine the effectiveness of a new curriculum on meeting program learning outcomes. If you are looking to make the move towards concept-based education in nursing, you can't afford to be without this innovative educational resource.

This official NLN guide is the only preparation book for the NLN Certified Academic Clinical Nurse Educator Examination (CNE@cl) that aligns with the NLN core competencies for academic clinical nurse educators and the test blueprint, giving you a competitive advantage. More than 500 multiple-choice questions with accompanying rationales provide essential review of test content and identify areas requiring further study, providing the preparation you need to excel on your exam. "Earning the CNE@cl certification demonstrates the nurse educator's commitment to excellence and professional expertise in the role of an academic clinical nurse educator."

Test-Taking Strategies chapter uses test examples to offer tips and techniques to improve your study habits and testing skills, increase critical thinking, and decrease anxiety. Primary Care chapters each follow a standard format: Disorders and Pharmacology. Special QSEN safety icons highlight and emphasize questions related to the graduate-level Safety competency of the Quality & Safety Education for Nurses initiative.

NLN Core Competencies for Nurse Educators: A Decade of Influence Judith A. Halstead, PhD, RN, ANEF, FAAN, Editor
Thirteen years after initial publication, the NLN Core Competencies for Nursing Educators continue to guide the development of graduate nursing programs, define the roles and responsibilities of nurse educators, and provide a framework for ongoing research in identifying the knowledge, skills, and attitudes essential to preparing a qualified nursing workforce. NLN Core Competencies for Nurse Educators: A Decade of Influence revisits these critical guidelines through a contemporary lens that underscores their ongoing influence and offers valuable insight into how they will help shape the evolution of the nurse educator role. Whether you're a practicing nurse educator or pursuing a career in nursing education, you'll gain a better understanding of the theoretical foundation behind this landmark literature and learn how to best use it to successfully navigate the complex role of today's nursing faculty. "Nurse educators, grounded by the current evidence about the role of the nurse educator, will ensure that the next generation of students is prepared to provide interdisciplinary, patient-focused, safe, and high-quality care." Diane M. Billings, EdD, RN, ANEF, FAAN Chancellor's Professor Emeritus
Indiana University School of Nursing, Indianapolis

Named a 2013 Doody's Core Title and Essential Purchase! Praise for the Third Edition: "I recommend this book as an introduction to new educators involved in clinical teaching." -Journal for Nurses in Staff Development
The fourth edition of this highly acclaimed text continues to provide a comprehensive framework for planning, guiding, and evaluating learning activities for graduate and undergraduate nursing students in numerous clinical settings. A respected resource for clinical faculty, it addresses the distinct requirements of clinical learning as opposed to classroom learning and provides proven strategies to maximize clinical education. The revision features expanded content on teaching graduate students, regulatory issues affecting distance education, and the use of social media. It covers establishing and using dedicated education units (DEUs), the challenges of student access to electronic health records and documentation of care, and reducing the demands of clinical staff members when multiple students rotate through a particular setting. Additionally, this edition provides guidelines for using preceptors, evaluating multimedia, and observing students in practice; sample observation guidelines, learning assignments, and clinical learning activities; and sample policies for clinical evaluation and adherence to professional conduct standards. It includes the latest revisions of the NCLEX test plan and the AACN Essentials guidelines for nursing education. The instructor's manual, which includes learning activities for each chapter and teaching suggestions, and PowerPoint presentations accompany the text. New to the Fourth edition: Two completely new chapters: the first "Developing Clinical Learning Sites," and the second "Pedagogical Technologies for Clinical Education" Expanded
