Great strides have been made in the past four decades in the development of geospatial data and tools that describe locations of objects on the Earth's surface and make it possible for anyone with access to the Internet to witness the magnitude of a disaster.

designed to be used by groups of SAs with the help of a facilitator. It can also be used by individual SAs who can get together with colleagues for discussions and activities where needed. It relies on a self-directed learning approach, allowing SAs to work at their own pace, drawing on their past counselling experience. The way it is used will be determined by each country's context, and the SAs preference. The MNH Counselling Handbook is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling

Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. Emergency Powers of International Organizations explores emergency politics of international organizations (IOs). It studies cases in which, based on justifications of exceptional necessity, IOs expand their authority, increase executive discretion, and interfere with the rights of their rule-addressees. This "IO

exceptionalism" is observable in crisis responses of a diverse set of institutions including the United Nations Security Council, the European Union, and the World Health Organization. Through six in-depth case studies, the book analyzes the institutional dynamics unfolding in the wake of the assumption of emergency powers by IOs. Sometimes, the exceptional competencies become normalized in the IOs' authority structures (the "ratchet effect"). In other cases, IO emergency powers provoke a backlash that eventually reverses or contains the expansions of authority (the "rollback effect"). To explain these variable outcomes, this book draws on sociological institutionalism to develop a proportionality theory of IO emergency powers. It contends that ratchets and rollbacks are a function of actors' ability to justify or contest emergency powers as

(dis)proportionate. The claim that the distribution of rhetorical power is decisive for the institutional outcome is tested against alternative rational institutionalist explanations that focus on institutional design and the distribution of institutional power among states. The proportionality theory holds across the cases studied in this book and clearly outcompetes the alternative accounts. Against the background of the empirical analysis, the book moreover provides a critical normative reflection on the (anti) constitutional effects of IO exceptionalism and highlights a potential connection between authoritarian traits in global governance and the system's current legitimacy crisis.

Taking seriously Ireland's euphemism for World War II, "the Emergency," Anna Teekell's *Emergency Writing* asks both what happens to literature written during a state of emergency and what it means for writing to be a response to an emergency. Bowen, Flann O'Brien, Louis MacNeice, Denis Devlin, and Patrick Kavanagh, and supported by archival material and historical research, *Emergency Writing* shows how Irish late modernism was a response to the sociopolitical conditions of a newly independent Irish Free State and to a fully emerged modernism in literature and art. What emerges in Irish writing in the wake of Independence, of the Gaelic Revival, of Yeats and of Joyce, is a body of work that invokes modernism as a set of discursive practices with which to counter the Free State's political pieties.

*Emergency Writing* provides a new approach to literary modernism and to the literature of conflict, considering the ethical dilemma of performing neutrality—emotionally, politically, and rhetorically—in a world at war.
