Dave Ross (1871–1943) and George Ade (1866–1944) were trustees, distinguished alumni and benefactors of Purdue University. Their friendship began in 1922 and led to their giving land and money for the 1924 construction of Ross–Ade Stadium, now a 70,000 seat athletic landmark on the West Lafayette campus. Their life stories date to 1883 Purdue and involve their separate student experiences and eventual fame. Their lives crossed paths with U.S. First Lady Eleanor Roosevelt, Henry Ford, Amelia Earhart, and Will Rogers among others. Gifts or ideas from Ross or Ade led to creation of the Purdue Research Foundation, Purdue Airport, Ross Hills Park, and Ross Engineering Camp. They helped Purdue Theater, the Harlequin Club and more. Ade, renowned author and playwright, did butt heads with Purdue administrators at times long ago, but remains a revered figure. Ross's ingenious mechanical inventions of gears still steer millions of motorized vehicles, boats,

Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

of UB ' s medical school, that UB developed its School of Arts and Sciences, and thus, assumed its place among the other institutions of higher education. Had Fillmore lived throughout UB ' s first seventy years, he would probably have been elated by the success of his university, and he should have been satisfied and pleased that UB remained intrinsically bonded to its community while at the same time engrafting the values and standards important to higher education ' s mission in the region. UB and its medical school have undergone many challenging transitions since 1846. Included among them were: (1) the completion of an academic campus in the far northeast corner of the City of Buffalo while leaving its medical, dental and law schools firmly situated in the core of downtown Buffalo; (2) the eventual relocation, after the second world war, of the law school to the newer campus in Amherst, and the medical and dental school to the original academic campus: and (3) the merger with the State University of New York System in 1962. Despite these significant transitions, any one of which could have changed the intrinsic integrity of UB and disrupted the bonding between community and university, that did not happen. To this day, the ties between community and academe persist. Fillmore and White should celebrate their success and

The Multiple Mini Interview (MMI) has become the preferred interview format at many health professions programs and medical schools.

Applicants seeking admission to these schools face considerable anxiety preparing for these interviews because of a lack of resources available for guidance. Our detailed advice, based on evidence from research in the field and perspectives of admissions faculty, will provide you with the insiders' perspective. How can you best prepare for the MMI? What is required to deliver a winning interview performance? Which behaviors, attitudes, and answers are prized by interviewers? Includes sample answers to MMI questions and advice to help you avoid common mistakes. This book shows applicants how to develop the optimal strategy for MMI success - an invaluable resource to help applicants gain that extra edge.

This is the first textbook designed to introduce the six areas of nursing competencies, as developed by the Quality and Safety Education for Nurses (QSEN) initiative, which are required content in undergraduate nursing programs.

The long standing nursing shortage has prompted many institutions to rely on nurses to delegate critical tasks.

Delegation of Nursing Care establishes safe delegation as an indispensable skill in delivering quality patient care. The book discusses the demanding roles of a professional nurse and explores the elements of decision making nurses use most. It also highlights the importance of communication, time management, and accountability, and is designed to build the diverse skills needed in the world of nursing.

problems in community health: diabetes, cancer, cardiovascular disease, HIV, asthma, and obesity. Following the trend begun by CDC and other agencies, the book takes a proactive and evidence-based approach reducing risk for individuals and communities. In a step by step approach, the book teaches how to design interventions, how to pick methods, how to assess the interventions' effects, and how to identify and address ethical challenges. The book refers constantly to real-world examples from across the US and also includes international examples of public health issues facing our communities today, and what to do about them. Part I of the book covers the fundamentals of interventions: Intervention rationale, Target population, Community setting, Design, Collaborations and partnerships, Political and organizational influence, Evaluation, Ethics, and Resources. Part II of the book covers types of interventions: formative intervention, informational intervention, social/behavioral, and environmental/policy. Most funding for community-based public health efforts is determined by categorical programs. Therefore, part III of the book is organized by major categories: Type II Diabetes, Cardiovascular disease, obesity, infectious disease, substance abuse, injury and violence, reproductive and sexual health, cancer, and maternal/child health. The book's web site will include links to databases; links to agency and public health resources; intervention tools; instructor guides, slides, assignments; and additional case examples"--Provided by publisher.
