The 2000 Standard Guide to Cars & Prices should help you avoid paying too much to realize yours. Established collectors, dealers, hobbyists, lenders, insurers and investors may find this book of specific interest. It offers values for: antiques; classics; postwar; milestones; muscle cars; imports; and trucks. *From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in Riding the Roller Coaster, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders-including Chrysler himself and Lee Iacocca-emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve. Includes entries for maps and atlases.*

*Of all of the pioneering custom-car builders to come to prominence in the 1950s--Harry Westergard, George Barris, and Dean Jeffries, among others--one of the most prolific was a young man from Modesto, California, named Gene Winfield. Cutting his teeth in California's hopping postwar hot rod scene, Gene eventually gravitated toward custom*

*cars, becoming one of the medium's preeminent and most-sought-after practitioners. For the first time, Gene's career is examined in this volume fully illustrated with photography from Gene's personal archive. Written by longtime Winfield employee David Grant, "The Legendary Hot Rods and Custom Cars of Gene Winfield" is culled from hours of interviews with Gene and recounts everything from his early days in Modesto and his first shop in a converted backyard chicken coop, to his role in forming the Century Toppers car club, his involvement in dry lakes and circle-track racing, the formation of Winfield's Custom Shop in 1955, and the impressive string of vehicles that followed. Cars featured include the Ford convertible that graced the second issue of Rod & Custom," the 1950 Solar Scene Mercury Coupe, the 1956 Mercury called Jade Idol, and the Ford King "T" that won the 1963 AMBR award, among dozens of others. Grant also delves into Winfield's involvement with model-maker AMT, movie and TV vehicles for such projects as "The Man from U.N.C.L.E." and "Get Smart," and reminisces from Winfield's contemporaries.*

*This book identifies the distinguishing features of fundamental theology, as distinct from philosophical theology, natural theology, apologetics, and other similar disciplines. Addressing the potential for confusion about basic Christian claims and beliefs, Gerald O'Collins sets out to relaunch fundamental theology as a discipline by presenting a coherent vision of basic theological questions and positions that lay the ground for work in specific areas of systematic theology. Rethinking Fundamental Theology examines central theological questions: about God, human experience and, specifically, religious experience; the divine revelation coming through the history of Israel and through the life, death and resurrection of Jesus; human faith that responds to revelation; the nature of tradition that transmits the record and reality of revelation; the structure of biblical inspiration and truth, as well as basic issues concerned with the formation of the canon; the founding of the Church with some leadership structures; the relationship between Christ's revelation and the faith of those who follow other religions. O'Collins concludes with some reflections on theological method. Written with*
